Board	CBSE
Medium	English
Year of Passing	2016
Grade	100%

WORK EXPERIENCE

Jan 2023 to Present

Web Developer at SRG Tec Solution

Develop, implement, and maintain dynamic web applications using PHP, Laravel, and other relevant technologies. Collaborate with cross-functional teams, including designers and other developers, to deliver scalable and high-performance web solutions. Design and implement efficient, reusable, and reliable PHP code to meet project requirements and deadlines. Troubleshoot, test, and debug web applications, identifying and resolving

technical issues promptly.

PROJECTS

Ecommerce Vegetables&Fruit, 31 Days

A user-friendly interface, and a reliable technology stack, My Project aims to revolutionize the way consumers buy fresh produce while providing local vendors and farmers with a robust platform to showcase and sell their products.

Flight Management System, 31 Days

Project Overview: Developed a flight reservation system for Alaska Airlines, utilizing Spring Boot, Hibernate, and MySQL, to streamline the flight booking process and enhance user experience. User Authentication: Implemented secure user authentication and authorization to ensure data privacy and user-specific access to booking features. Database Management: Designed and maintained a relational database using MySQL to store flight information, user profiles, and reservation records efficiently. User Interface: Created a responsive and user-friendly front-end interface with HTML, CSS, and JavaScript for passengers to search for flights, make reservations, and view booking details. Flight Management: Integrated a comprehensive flight management module to display flight details, including departure and arrival cities, operating airlines, and departure times. Reservation System: Developed a robust reservation system allowing users to book flights, enter passenger details, and receive
